

**Do the Right Thing**

Dear Governor O'Malley,

I urge you to stop the ICC. Studies have shown that the ICC won't reduce congestion on the Beltway, I-270, I-95 or most local roads. It would drain funding from urgently needed transit, saddle us with \$2 billion of long-term debt, and generate more traffic and sprawl. It would increase air pollution, hasten global warming, destroy precious forests, wetlands and farmland, wreck communities, and harm the Rock Creek, Anacostia, Potomac and Chesapeake watersheds.

It's time for you to do the right thing. Stop the ICC once and for all and lead Maryland on the path to sustainable development and transportation..

Sincerely,
